INFOTECH — WEBSITE SCRIPT (2026 TREND)

Full section-by-section script and UI direction for the public-facing marketing website, written for a high-conversion, lead-generation-focused build.

1. Hero Section (High-Conversion)

Headline: "Build Smarter. Scale Faster. Grow with Infotech."

Subtext: We help businesses transform digitally with AI-powered solutions, modern development, and growth-focused strategies.

CTA Buttons: Start Your Project | Get Free Consultation

UI Idea

- Animated gradient background
- Floating tech elements (AI, code, graphs)
- Live counters (Projects, Clients, Growth %)

2. Trust & Credibility Bar

"Trusted by startups, brands, and growing businesses"

- Client logos slider
- Ratings (star display)
- Stats: 100+ Projects Delivered · 50+ Happy Clients · 5+ Years Experience

3. Solutions (Modern Approach)

Solution	Description
Web & Platform Development	Fast, responsive, and scalable websites & web apps.
AI & Automation Systems	Chatbots, CRM automation, workflow tools.
Growth Marketing	SEO, paid ads, funnel optimization, analytics.
Custom Software	Tailor-made dashboards, CRM, ERP systems.

Focus: "Solutions that grow business" — not just services.

4. Why Infotech

- Fast Delivery with Agile Process
- AI-Driven Development
- ROI-Focused Execution
- Secure & Scalable Architecture

- Dedicated Support Team

5. Case Studies (Trend Feature)

Case Study	Result
E-commerce Platform	+250% Traffic, +120% Sales
Startup Launch	0 → 10K Users in 90 Days
Business Automation	Reduced manual work by 70%

6. Interactive Tools

- ROI Calculator
- Website Speed Checker
- AI Chat Assistant

7. Careers & Internship Hub

"Learn. Build. Grow with Infotech."

- Developer Internships
- Digital Marketing Training
- Real Project Experience
- Certification Programs

CTA: Apply Now

8. Testimonials

- Video reviews
- Client feedback cards
- Success stories

9. Smart Enquiry Funnel

- Step 1: Select Service
- Step 2: Enter Details
- Step 3: Choose Budget
- Step 4: Submit

Fields: Name · Phone · Email · Business Type · Budget Range · Project Requirement

Auto Response: "Thank you! Our team will contact you within 24 hours."

10. Blog & Insights

- Tech blogs
- Marketing strategies
- AI trends

- Business growth tips

11. Footer

- Quick Links: Services, Careers, Contact
- Social Media Icons
- Floating: WhatsApp Button + Live Chat

12. Tech Stack

Layer	Technology
Frontend	Next.js (SEO optimized), Tailwind CSS, Framer Motion
Backend	Node.js (Express / NestJS)
Database	MongoDB / MySQL
Extras	AI integration, Google Analytics, Cloud hosting

"Infotech should look like a product, not just a company."

PART B

INFOTECH — ADMIN DASHBOARD SYSTEM DOCUMENT

This section describes the complete Infotech Admin Dashboard system including the HR module, Internship module, Attendance tracking, Payroll system, and CRM features.

1. Overview

Infotech Admin Dashboard is a SaaS-style management system combining CRM, HR management, employee tracking, internship monitoring, attendance automation, and payroll processing.

2. Core Modules

- Dashboard Analytics
- Employee Management System
- Internship Management System
- Attendance Tracking System
- Payroll System
- Lead CRM System
- Reports & Analytics
- Settings & Role Management

3. Role-Based Access

Every user logs in through a role-based portal that determines which screens and data they can see.

- **Admin** — full access to all modules, all users' data, and system settings.
- **Manager** — access to team leads, attendance, and reports for their department.
- **Finance** — access to payroll, attendance summaries, and salary processing.
- **Employee** — personal dashboard: attendance check-in/out, payslips, profile.
- **Intern** — personal dashboard: attendance check-in/out, daily report submission, feedback from Admin.

4. Employee Management System (HR Module)

Central registry for every person in the organization — employees and interns alike.

- Add / Edit / Deactivate employee & intern profiles
- Fields: Name, Photo, Role, Department, Employee/Intern ID, Joining Date, Reporting Manager
- Document storage: ID proof, contract, offer letter
- Department & designation management
- Login credential creation and password reset

5. Internship Management System

Interns get a dedicated login where they submit a Daily Report and check in/out each day. Admin reviews every report and can add comments or feedback, visible back to the intern.

Daily Report Fields

- Date
- Tasks Completed
- Hours Spent
- Blockers / Issues Faced
- Key Learnings
- Attachments (optional)

Admin Review Workflow

- View all intern reports, filterable by intern name and date range
- Mark status: Reviewed / Pending
- Add comments or feedback directly on a report
- Optional weekly performance rating (Excellent / Good / Needs Improvement)

6. Attendance Tracking System

Applies to **all users** — Admin, Finance, every department's employees, and interns.

- Check-In / Check-Out button on every user's personal dashboard
- Automatic timestamp capture (optional IP/geo validation for remote staff)
- Auto-calculated Total Hours Worked per day
- Automatic flags: Late Check-in, Early Check-out, Absent
- Consolidated attendance sheet for Admin: Name, Department, Date, In-Time, Out-Time, Total Hours, Status
- Monthly attendance calendar view per user
- Leave / absence marking

7. Payroll System

Salary processing built on top of the attendance data, managed by Finance and reviewed by Admin.

- Salary structure setup per employee (base pay, allowances, deductions)
- Auto-calculation of payable salary using attendance & leave records
- Monthly payslip generation (PDF), downloadable by employee
- Payment status tracking: Pending / Processed / Paid
- Payroll summary reports exportable for accounting

8. Lead CRM System

- View all website enquiries in one place

- Assign leads to team members
- Status tracking: New → In Progress → Closed
- Notes & follow-up scheduling
- Automation: auto email replies, lead scoring, WhatsApp notifications

9. Reports & Analytics

- Visitor & traffic insights
- Lead source breakdown
- Campaign performance
- Attendance & payroll exports (Excel / PDF)
- Intern performance history

10. Settings & Role Management

- General settings (branding, company info)
- API configuration
- Email SMTP setup
- WhatsApp integration
- Role & permission management for every user type

11. Suggested Database Tables

Table	Fields
users	id, name, email, password_hash, role, department, join_date, status
attendance	id, user_id, date, in_time, out_time, total_hours, status
daily_reports	id, user_id, date, tasks_completed, hours_spent, blockers, learnings, attachment_url, status
report_comments	id, report_id, admin_id, comment_text, created_at
payroll	id, user_id, month, base_pay, allowances, deductions, net_pay, payment_status
leads	id, name, phone, email, service, budget, status, assigned_to, created_at

INFOTECH — FIGMA WIREFRAME SPECIFICATION

Screen-by-screen layout guidance for the design team, covering the public website, the admin dashboard, reusable components, and responsive behavior.

1. Frame Setup (Figma)

Device	Width / Grid
Desktop	1440px — 12-column grid, 80px margin, 24px gutter
Tablet	768px — stacked grid
Mobile	375px — single column, hamburger nav

Spacing System (8px base): 8 / 16 / 24 / 32 / 48 / 64

2. Homepage Wireframe

1. Navbar: Height: 80px, sticky. Layout: [Logo] | [Menu Links] | [CTA Button]. Menu: Home | Solutions | Case Studies | Careers | Blog. Right: Login | Get Started.

2. Hero: Height: 100vh, 2 columns. LEFT (50%): H1, Subtext, 2 CTA buttons, small trust text. RIGHT (50%): illustration/dashboard mockup with floating icons. Bottom: 3-column stats row.

3. Trust Bar: Height: 100px. Auto-scrolling logo slider + "Trusted by..." text.

4. Solutions: Centered title, 2x2 grid of 4 cards (icon + title + short text), 24px gap.

5. Why Choose Us: Split layout: LEFT 4 bullet points (icon + text); RIGHT image/illustration.

6. Case Studies: Horizontal scroll, 3 cards visible at once. Each card: image, title, metrics, button.

7. Interactive Tools: 3-card row: ROI Calculator, Website Audit, AI Chat — each icon + title + CTA.

8. Careers: LEFT: title, description, CTA. RIGHT: illustration. Below: 3 job cards.

9. Testimonials: Slider layout. Card: profile image, name, feedback text.

10. Enquiry Funnel (Modal): Centered modal: Step 1 Service Selection (cards), Step 2 Form Inputs, Step 3 Budget Slider, Step 4 Submit.

11. Blog: 3-column grid. Card: image, title, short text.

12. Footer: 4 columns: Company, Services, Resources, Contact. Bottom bar: copyright + social icons. Floating WhatsApp button.

3. Admin Dashboard Wireframe

Login Screen: Centered card: Logo, Email, Password, Login button.

Dashboard Home: LEFT sidebar (250px): Dashboard, Leads, Projects, Careers, People/Attendance, Payroll, Settings. MAIN: 4 stat cards (top), Revenue/Leads graph (middle), Recent Activity table (bottom).

Leads Page: Table layout — Columns: Name, Phone, Service, Status. Right: action buttons. Top: filters + search.

People & Attendance Page: Table of all interns/employees with In-Time, Out-Time, Total Hours, Status. Tab to switch to Intern Daily Reports list with a comment panel per report.

Payroll Page: Table of employees with base pay, deductions, net pay, payment status. Button to generate payslip PDF.

CMS Page: Form layout: section selector, text editor, image upload, save button.

Careers Page: List layout: applicant name, role, resume download.

Settings Page: Tabs: General, API, Email, Integrations.

4. Components (Figma)

- Button (Primary / Secondary)
- Card (Service / Blog / Case Study)
- Navbar
- Footer
- Form Inputs
- Modal
- Sidebar

5. Design Tokens

Colors: Primary Blue · Dark Background · Light Text

Typography: H1 48px · H2 36px · Body 16px

6. Mobile Wireframe Notes

- Stack all sections vertically
- Navbar → Hamburger menu
- Cards → 1 per row
- Reduce spacing
- Sticky CTA button

7. Final Handoff Flow

- Step 1: Create Homepage in Figma
- Step 2: Convert to Components
- Step 3: Design Inner Pages
- Step 4: Create Prototype (clickable)

This wireframe should be Clean, Minimal, and Conversion-focused. Think: SaaS dashboard + Agency hybrid. NOT an old corporate website. Infotech should look like a product, not just a company.
